# **NOMAR® BUMPERS**

by

Granger Marine Products

Shown with 4.5' Nomar® bumpers with straps & pad eyes

---

Nomar® Bumpers are a soft-mounted bumper which absorbs impact and allows you to slide in and out of your slip with no friction, drag or marring of your hull. This makes for a safer & less stressful docking experience by allowing everyone to stay on board. Nomar® Bumpers eliminates the need for fenders & are perfect for tight docking situations and narrow slips. They also allow the vessel closer to the dock for easier and safer boarding.

MADE IN THE USA

## MOST FREQUENTLY ASKED QUESTIONS FROM OUR CUSTOMERS

**Q. I have a colored hull. Will these Nomar® bumpers mar the hull?**

**A.** No. These are non-marring bumpers. The Nomar® bumpers outer shell is 100% pure polyester and **guaranteed** not to mar.

**Q. Are they available in any other color besides white?**

**A.** No. The outer material is pure polyester in it's natural state. This is what holds up to the UV. Adding dyes to the fabric compromises the UV factor.

**Q. Can these be mounted vertically on pilings?**

**A.** Yes. We have customers who mount our Nomar® bumpers vertically for boat houses and on pilings.

**Q. Do I need to run the Nomar® bumpers continuous?**

**A.** No . Power boaters can space the Nomar® bumpers Approximately 4' apart. Sailboaters can space the Nomar® bumpers 3' apart. By spacing the Nomar® bumpers along the dock you get a lot of coverage with just a few Nomar® bumpers.

**Q. How long will Nomar® bumpers last on the dock?**

**A.** Our Nomar® bumpers will last 18-22 years.

**Q. Is there any warranty on the Nomar® bumpers?**

**A.** Yes. We **warranty** our Nomar® bumpers for **5 years** on workmanship and materials.

## We have multiple mounting formats to meet most any dock configuration

**Shown — 4.5' bumpers with straps.** Use in a marina that does not allow anything screwed to the dock. Also, if you have a boat on a lake that freezes in the winter, you can unstrap the Nomar® bumpers in winter or if you move, just unstrap the Nomar® bumpers and take them with you. Available 3' and 4.5' lengths.

**Shown — 3' corner bumpers without straps.** The dimensions are 12" on the outside edge, 6" radius around the corner, 18" on the inside of the slip. You do not need a wheel with our corners. Our Nomar® corner bumpers protect the dock and your boat at the same time! Also available with straps.

**Shown — 4.5' bumpers without straps.** There is an 1 1/2" lip of material top and bottom for mounting. You can either mount flat on the face board or you can roll the top lip over the top of the dock. That will mount the bumper higher up in case you have a spray rail or a heavy windward side. Available in 3' and 4.5' lengths.
